## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE one MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Applicants' election of Group 6 (claims 20-24) with traverse is acknowledged. In accordance therewith, claims 1-19 and 25-27 are withdrawn from consideration.

Applicants have argued that Groups 2-5 and 7 should be rejoined with Group 6 because once the Group 6 method has been fully searched, no additional searching would be required for any of the remaining Groups (of Groups 2-5 and 7). However, this is not necessarily true. Group 6 is distinguished from any of 2-5, 7 in that Group 6 is drawn to a method for inducing oxidative stress, rather than to a method of treating a disease or killing a tumor cell. Group 6 is also distinguished because it requires the administration of a "cellular metabolite", which is not required by the other groups. Unlike Group 2, Group 6 does not exclude texaphyrins. Group 6 is distinguished from Group 3 in part because Group 3 requires an assay method, which is not required of Group 6. Group 6 is also distinguished because it does not actually require killing of tumor cells. A physician might want to induce "targetted oxidative stress" in tissues bearing viruses, bacteria, or parasites, for example. However, in the event that claims within Group 6 are found allowable without significant (further) limitation, the possibility of rejoining one or more of the non-elected groups will be considered.

The restriction is maintained at the present time.

\*

Applicants are required under 35 U.S.C. §121 to elect species (as follows) for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

- (a) an agent that accumulates in neoplastic tissue in accordance with claim 20, step (a);
- (b) a cellular metabolite such as ascorbate, NADPH, FADH<sub>2</sub> or reduced glutathione in accordance with claim 20, step (a);
- (c) a "cellular metabolite" in accordance with claim 20, step (c); this can be this same as the "cellular metabolite" elected for step (a);
- (d) (i) ionizing radiation is required, or (ii) ionizing radiation is not required.

Applicant is advised that a response to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a generic claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are witten in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP 809.02(a).

Should applicant traverse on the ground that the species are not patentable distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. §103 of the other invention. Applicant is advised that for the response to this requirement to be complete, an election of the invention to be examined must be indicated, even if the requirement is traversed (37 C.F.R. 1.143).

Applicant is reminded that upon cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).
